

## *Students: Who Connects Your Dots?*

*How do you interpret the truthfulness of information presented to you?*

*How do you make intelligent and rational decisions?*

*How do you evaluate the validity of a persuasive argument without bias?*

*Who is connecting your dots?*

Critical thinking is essential for students to develop as it helps them process and analyze information logically and effectively. *Students: Who Connects Your Dots?* challenges students of all ages to make sound decisions, solve problems, and evaluate the validity and truthfulness of information and arguments. It also encourages students to question their own biases, leading to a more open-minded and informed perspective. Students who study and put into practice critical thinking ideas and questions from *Students: Who Connects Your Dots?* become more independent and responsible learners, preparing them for success in their academic and professional careers.

Additionally, critical thinking fosters creativity, innovation, and the ability to adapt and thrive *rationally* in an ever-changing world. *Students: Who Connects Your Dots?* capitalizes on these concepts as developing critical thinking skills is *crucial* for students to become well-rounded, intellectually engaged, and active citizens in society. Whether in a school, university, homeschool, community, church, or any setting with a group eager to learn, *Students: Who Connects Your Dots?* is a complete course for critical thinking attainment.
